It was in expectation at W. Johnston's office for some since that there would be a circular next from Dame-41975. Never mind that; did you understand that the circular you found in Enstance-street was practically

Mr. Johnston's suggestion !- I will answer that, if you give me three words of explanation \$1976. Can you answer the question !- The circulars same from Johnson's office

41977. Were you aware of that? Did you understand at the time you sow them, either from what Crostlewaits or Johnston told you that the circular was the production of W. You wore so beaus of intimary with him at the time! Did you ever understand where he get the money !-- No; when I saked him once, he told me not to ask those questions, for if he was to inform me I washibe too wise; and I never select the praction again.

Do you happen to have a copy of Shocirculars! I have not.

I suppose you sunt circulus to everybody -Oh no, not to all-only to those who were marked

as being supporters of the yorky 45000. What mark denoted that !-- I think it was a little pip or pop, opposite to each of them.

49501. Do you mean a tick i—No, a sort of 404. 42002. A mere round dot !—Yes. 42003. The brackle contained about two or three quires... they were written on paper the size of note paper.
42007. You can tell us perhaps, having amisted in

the composition of these circulars, what she exhitance was !- It was studing the fact of the election being about to take place and urging their attendance at it, and requesting them to give an narwer in order that arrangements might be made. 42006. I suppose you bad some little trouble in

antiline the form of the circulari... There was a great deal 42009. You wished remotely to indicate by the word "arrangement" that the travelling expenses were open 42010. That was the meaning of the missingle word 42011. How many days, Mr. Alme, wore you at work

in Eustace-street after you first came there before you moved scross to Dame-street 1-A day or two. I should my peckeys two at most. It was discovered there was a postlernan Eving at Eurtaco etrock----42012. Of the opposite side, I suppose !- No. not at all, that is a minaporebonsion. It was discovered

that there was a gentlemen in a room in the same keeps under the office used by Mr. Greethwaite and it was thought unadvisable that letters, of a private vature, of course, should be copping to the same bosse where that gentlemen had an office, he being an agentof the opposite ride. 42012. A record of course was kept there of the out-votes who, under that tempting ward "arrange-ment," spake of baring their expenses paid 1—I think is well as my memory server me, I suggested to Mr. Crosthwaits to alphabetically arrange the names of those to whom letters were sort, and to put in alphahetical order all letters received from those parties, and

to make a very short precis of what they wanted 45035. Was that dans as far as you understood !-43026. Mr. Crusthwaite, in fact, was acting under your directions 1--Yes. He detected very much to 40027. You understood he was to not as your secretary 1-Yes.

Are you able to tell us, to the best of your knowledge and belief, whether the employment that was given to the humbler classes of voters who signed these papers was bose finic employment !-- I am not aware of how many were conjuged. I am not aware that any were employed.

know anything about it. I was not though the wards The only employment that could be given to them was to canven their brother electors, and what that is 44004 That would depend on the number to be marraned !-- If one got a list with twenty names on

it, he had to see who the parties were, and that may seeingy him for a day or two. He should be yould for de lors of terms 44005. We had instrume of persons employed to someon, who were given a last of names that had been fotion t—So it must occur. You don't understand how these things were divided at elections. You must know haw the lists are made out. The hote are made

out for the day of the election, for the people to canvaco with. There hate, with five or six merces some times on them, are given to different parties to see if they are brought up to the poll. You heard of the Cellege to see if he was brought up to the pull-that was his buniness, and then to convey the information

It was the component thing in the world to see two persons going up to vote tegether. 44619. That was not all you saw t-I only now the introduction at this time. I saw Dr. Hall recentedly

Why was it to be transferred to Fostsonstreet from his own office !- It was intended that the office for the out-votes should be reparate and distinct, where they should no for payment of their expenses after voting.

44636. The office in Palaco-street would answer for

that purpose !- It would not; he has only a irmited amount of space there, and it weaks not do at all. 44627. Was that the reason at you transferred !-- I think that was one of the reasons. The reason was, that it should be a reparate department altogether. 14638 It would be a sensence department in Palace-street !-- No solution would have that lummers carried on in his office; no one would have a great concourse of recals rushing into his office at the same

There were more than parameter seems that year; Ince work there than double the number admitted that year than any year since or before—what was the reserce of that i—That was in consequence of the fund having been got up to 45046. And I suppose the find having been get up for the purpose, there were circulars sent out for other freezen to give information as to who could be made

new fretmen-was that done on several consider to 45047. I emprose, then, this large number in 1861 was very much to be stirributed—first, to the fixed to pay their administs; and, secondly, to the exertions

45(6). You attribute the number to the fund and to

the exerticity !- There was a gross number made as Six chin Barrington's year, and come other Conservative Mayor's years. 45152. As a matter of fact, were there more admin-

sires in a Conservative Lord Mayor's year than in 45055. Were there many neighbors of freezen, in your time, in right of graniforth !—A good number.
46464. It was a littigated master for some time, and

finally it was hold that it was a good title !- It was other the decision of the Queen's Bench in 1861, I think, that we made as many by grandhirth as pos-able, as there was a rumour of a Reform Bill being brought in to do away with the froman altogether.

ment !- Yes. 45070. You would have given the preference, most, to a freezan over any other class of voter if he was equally good!—There were more fromen always looking for employment than any other class.
41080. Did you understand that they looked for

employment to make a little of what was going at the time of the election !- There were some of the freezen 45081. I suppose there were some of the freezen,

as we know from what we have seen, who would take money if they could get it from either side !- There 45089. About how many, speaking very generally and speculatively—were open to personate of that from from either side t—I would say about 200. 45085. I europee there was a still lurger none who would not like at all to vote for the Libraria, but who expected same little gratuity for keeping straight? -When I say 300, you would have to give them money to keep their from voting for the other side,

45154. Mr. Law,-I behave you are connected with the Liberal Registration Society 1—I are.

45185. You are the housing secretary of it 1—I 45150. How long have you been so 1-Only since

last June.

Who is associated with you in that duty !--Mr. M'Sheehr. 45168 Since last Jane 1-I was at the revision of

1805, so for an taking part in court; but I had meshing to say to the preparation for it. 45159. Whe society has been in existence for some wares. have you books showing the expenditure each

45100. Are those in your custody 1—They see, 45101. Have you get those books at present with you in court 1—No. I seet a while ago for those. 45162. If they do not come in time for us to-day, will you be good enough to have them with you to morrow morning, so as to enable us to see what the

expanditure each year has been for some years back?

—The expense book that I have only goes to 1868 and 45145. Can you tell us in yound numbers for the present de bese eses, how much the expenditure on bohalf of very society was for the year 1908 t .- Well, as far as I man my from books, I would take the man to be accessfure about \$413, but those was good deal

more than that I suspent. I know myself that there was \$50 or \$70 mont on our hire sloss during the re vision, which is not entered in that. I think if Mr. M'Shooly is not here, the best way in which you our get at the exact expenditure would be the bank book, for all the subscriptions were lodged and drawn

45144. All by cheques -All by cheques If we had the bank book ledgments for 45155. If we had the bank book ledgment 1868 t-The ladgments for 1848 show the entire. 45146. Is that acceptable !—It is. 46147. Bring that; and perhaps, Mr. O'Shaugh

array, you would be good enough yourself on a sheet of paper to give us the totals of 1955—the totals of the conscriptions, and of the expenses on each side!—I see not sufficiently acquainted with 1868; if Mr McSheehy

45148 The dates of the chouse !-- Oh, yes, the inter of the choques.
45109. We want to see what the gross assessed was would you say from what you have seen that the entire evereshippe for 1858 was under £900 1-Oh, no ; I am

eane it was more than that.
45170. Was it under £1,000 !—I should say it was about £500. It is only right to may that in preparing for the revision of 1848 each ward submitted and formed a sort of clab, and prepared for the revision in that way. They prepared a great number of lodger children

which took a great deal from the expenses of the onetral office.

45171. Do you know, as a matter of fact, if there was any organisation of the kind on the part of the Conservatives in such word in Dublis 1—There was not in 1868, I think. There were claim, but they did

ey actes. 40172. They did not undertake that expenditure 5 possition was under £1,000, you do not include the superses of the different wards 1—No ; I don't know

if anything was expended at all.

40176. Mr. Law.—Are they over connected with the ceptral registy in one way so that you could ascertain the smount that they expended !- I don't think I could possibly nesertain it. I think of was very reach mixed an with numicipal affairs. Whenever these is a slab-

to the words it is chiefly for municipal matters. They merely take upon themselves to usuist, as there is a great deal to be done in a short time. 45175. Have the clobs in the several wards someturies and trusturers, and all that machinery!-Oh, I know that how I become connected with them first was having something to say to Fitzwillian ward, in which I would and I think the accommission in

Fitswilliam ward was something about £40 in the 45176. You mean the entire expenditure for the year 1—You. Oh, it was merely a thing get up just after the possing of the Roform Bill, and conced me-

mediately after the revision began.
45117. The £40 would be all connected with per-Essentary matters ! In that ward it was 45178. Would you say from your knowledge of Dublin, would the £40 spent there, or say £30, be shout the sum that other wards would naturally spend in the same way!-Fitavilliam word is a small ward. and inhabited by people of the better class.
45175 Ms. Taxov —And would the expenses of

Fitswilliam ward be more likely on that account to be small !- Yes. The expenditure for the revision in 1848 in the words was considerable; I should say it 45180 Mr. Law .- For the whole !- Yes

45183. Could you without inconvenience, get the assounts for us four the secretaries of the different words -- Well. I am afmid it would be almost in-45182. We do not want all the small items !--

There is a good deal of maney wasted.

45183. Hr. Hozers.—I suppose their accounts are mixed up t-We never have envilling to say to them.
45184. Hr. Law. What Mr. Murris mouse is, that the manisipal and the parliamentary matters were 43183. However, the excenditure, you say, of the central society was consthing under £1,000 1-4 think about £500. There was a statement of the expenditure, though the hooks don't show it. Isod before the

committee electiv after the revision, and I think My. 48186 Could you say this from your knowledge of three mattern? If you yet 4800 doors as the secpenditure of the sentral committee, and put, my the nune amount, namely, £800 more, to cover the exseems of the words, would that be apparate !-- I think you put down £300 for the expenditure of our office, and £800 for the wards, it would be about the

thing at close as I could go 45187. That would be £1,0001-One thousand six hundred pounds 42,0001-0h ves.

45188. Would the entire expenditure be under 22,000 — Oh, yes.

40183. Very much f—Certainly. We got a great
number of things for nothing; the lautence, I think there were either eight or nine course sitting, and no one in any of these courts was paid snything. At the other side they had two man in each court, both of whom were paid; and that made a considerable difference.

We had necessary advertisements for nothing, and serroud things of the sort, which kept down the cost 45150. Mr. Tayor. - The expenditure, then, Mr. no index that that would be a proper expenditure on the part of the Conservations 1—No. 45191. Mr. Law.—The free of the professional gentiemen renet be added, and the cost of advertise-

ments, and pechaps other things also I—We got a great member of things free of charge. 45192. Did you take any part in the last election of 18681—Yes, I was engaged in the Royal Exchange, ward for Mr. Pin; I had charge of the ward. 45193 Was that on the day of the election:

45184. From the time the committee was organized? -X es 45196. Had you apriling to do with the freemen of that ward !-- We were sent lists of the freezen,

but we did not do anything with them.

45199. Were they carrawed?—I think they were. 45197. By where I ... Well. I had two men who went shout ammert them; but we were told not to trouble ourselves much amongst the freezen, as there was a enodal proceduation for them senodal on various 45198: Can you give us any information as to what that organization was !- I don't know: I think the way in which the election was comported was that there was a solicitor in charge of each word, and two solisitors in charge of the freemen reparately 45199. Who were they !- Upon my word I don't know exactly who they were. I think Mr. O'Reilly. was one. The only thing that I remember was that

they came round once or twice to not from us any information that we could give them about the freemen 45200. And they got it!-They got it. It was nothing I think:

45207. We know of about that I suppose we have

nearly got as far as we can go on that. Did you hear 45908. Did any once come to your knowledge of freemen reking for or looking for manny on your side?

In 1865 there was no much

confusion, the revision was hardly over when the election hopes.
